Installing iriver plus 3

iriver plus 3 is an integrated software that efficiently manages music files. iriver plus 3 gives you freedom to transfer music files from PC to the player.

1. Insert the installation CD to your PC to display the installation process screen.

2. Click [Install] and complete the installation process following the on-screen instructions.

Note

- Minimum requirements for using iriver plus 3
  - Intel® Pentium® II 233MHz or higher processor speed
  - Windows 2000/XP
  - 64MB or above memory
  - 30MB or above hard disk space
  - 16bit enabled speaker and sound card
  - Microsoft Internet Explorer version 6.0 or later
  - SVGA or high resolution monitor (1024x768 resolution or higher)

- For more information on using iriver plus 3, refer to page 26~29.
Installing Windows Media Player 11

1. Insert the installation CD to your PC to display the installation process screen.

2. Select Windows Media Player 11 and click the [Install] button. Complete the installation process following the on-screen instructions.

Note

- Minimum requirements for using Windows Media Player 11
  - Windows® Vista
  - Intel® Pentium® II 800MHz or higher processor speed • 512 MB or greater memory • 20GB or greater hard disk space
  - 16-bit enabled speaker and sound card • Microsoft Internet Explorer version 6.0 or later
  - SVGA or high resolution monitor (1024x768 resolution or greater)
- For more information on Windows Media Player 11, refer to pages 30~32.
Chapter 2

**Basic Operations**

- Charging the Battery 10
- Turning on / off the Player 11
- Playing Music Files 12
- Connecting Products
  - Connecting earphones to the Mplayer 13
  - Connecting earphones while playing music 13
  - Connecting necklace 14
  - Disconnecting extension earphones from main line 14
  - Connecting the Mplayer to your PC 15
  - Copying file/folder (Using as a removable disk) 16
  - Disconnecting the Mplayer from your PC 17
Charging the Battery

1. Press the [播放] button on the product to turn it on.
2. Turn on your PC and connect the Mplayer to it using the USB cable.

Note
- It is recommended to use provided USB cable only. Otherwise, the device may malfunction.
- Check if the Mplayer is connected to a high-power USB 2.0 port. Some low-power USB ports built in some peripheral devices such as certain keyboards and USB hub without integrated power may not provide enough power to charge.
- If the computer is in sleep mode, the Mplayer may not be charged in some computers.
- The battery will be 80-percent charged in about 1.5 hour (with red LED), and fully charged within about 2.5 hours (with green LED).
- You cannot play music while charging the product.
Turning on / off the Player

1. Press the [②] button to turn on the product. You will hear a beep with green LED.
2. Press the [②] button again to turn off the product. You will hear a beep with red LED.

Note
- If the Mplayer does not respond when pressing the [②] button, check to see if the battery is properly charged.
- If remaining battery power is not sufficient, the power will be automatically turned off after 3 beeps.
Playing Music Files

1. Press the [?] button to play music file. You will hear a beep with green LED.

Note

- Music playback will be resumed when you turn the product off and on again while listening to music.
Connecting Products

- Connecting earphones to the Mplayer

1. Connect the earphones to the jack of the product.

- Connecting earphones while playing music

1. If you disconnect the earphones while listening to music, music playback will be stopped and key input will be disabled. However, the [○] button will be still enabled.
2. Reconnect the earphones to resume music playback.

Note

- To use the ‘automatic playback resuming’ function, you need to reconnect the earphones within 1 minute after disconnection. After 1 minute, the product will be automatically turned off.
Connecting Products

| Connecting necklace |

1. Twist the detachable part of necklace to separate it into two pieces.

2. Hold the separated part of necklace and push it into the direction of arrow.

| Disconnecting extension earphones from main line |

1. Twist the detachable part of earphones to separate it into two pieces.
Connecting Products

| Connecting the Mplayer to your PC |

1. Press the [ ] button on the product to turn it on.

2. Turn on your PC and connect the Mplayer to it using the USB cable.
Connecting Products

Copying file / folder to the product
1. Select the file / folder in your PC and drag & drop it to the drive which appears as a product.

Deleting file/folder from the product
1. After selecting the file / folder, click it with the right mouse button and select [Delete].

Note
- Always properly connect the USB cable.
- While transferring data using the USB cable, the red LED will be flashed.
  Do not turn off the product or disconnect the USB cable to protect your data from damage.
Connecting Products

Disconnecting the Mplayer from your PC

1. Click the icon on the taskbar to disconnect the product using the “Safely Remove Hardware” menu.

2. Click the [Stop] button to confirm disconnection.

Note
- The icon on the taskbar might be hidden in some operating systems such as Windows XP. Click “Show hidden icons” to display the hidden icon.
- The “Safely Remove Hardware” may not be available while using some applications such as Windows Explorer or Windows Media Player. Close all applications first before performing the “Safely Remove Hardware”.
- If the “Safely Remove Hardware” is not performed properly, try it again after a few minutes.
Chapter 3
Using the Mplayer

Music
- Playing Music Files 20
- Listening to Music 21
- Selecting additional functions 22
Music

1. Press the [Play] button to play music file.
   You will hear a beep with green LED.

Note

- If there is a music file to play when you press the [Play] button, the previous track will be played.
  If not, you will hear beeps with 2-second interval.
- If there is any error while playing music, the next track will be played after 2 beeps.
Music

| Listening to Music |

1. To control the volume while playing, turn the [+/−] button to left or right.

2. To play previous / next music while playing, turn the [◀/▶] button to left or right.

3. To use fast reverse / fast forward function, turn and hold the [◀/▶] button to left or right.
Music

Selecting additional functions (Shuffle On / Off)

1. Turn the [+/-] buttons shortly to left / right together to activate the function. You will hear a beep.

2. Turn the [-/+] buttons shortly to left / right together to activate the function. You will hear a beep.
Music

Selecting additional functions (Moving to next / previous directory)

1. While playing music, turn the [〈] button shortly to left, then turn and hold it again to the same direction within 2 seconds to play the first track in the previous directory. You will hear a beep.

2. While playing music, turn the [〉] button shortly to right, then turn and hold it again to the same direction within 2 seconds to play the first track in the next directory. You will hear a beep.
